CERTIFICATION

- ADOBE CERTIFIED PROFESSIONAL - AEM DEVELOPER CERTIFICATE.
- ORACLE CERTIFIED ASSOCIATE, Java SE 8 Programmer
- Create Adaptive Forms using Adobe Experience Manager
- ASSOCIATE - Mechanical Design (CSWA) CERTIFICATE ID: C-2YD6J47PBE.

WORK EXPERIENCE

Cognizant Technology Solution (2.6 years & Working)

> NOVO NORDISK - Projects

Technology: AEMaaCloud, HTML, CSS, JS, JAVA, REACT, GitHub

Highlights:

- In my current role as an AEM backend developer, I have been instrumental in migrating AEM 6.5 to the AEM as Cloud.
- My core expertise in crafting robust, scalable, and reusable components has been pivotal to the project's success.
- I worked on several critical components utilising Sling Models and developing comprehensive JUnit test cases.
- I engaged in close collaboration with the front-end team to facilitate the integration of AEM components into React code, ensuring seamless and efficient functionality.
- Furthermore, I implemented advanced dialog validations, using JavaScript and ClientLib. I also included in integrating a third-party API to enable chat bot functionality within the Side Menu component.
- In the project, I utilised Git for version control and code deployment, ensuring efficient collaboration and code management.
- I also worked across various AEM environments to test the functionality of components, identifying and resolving bugs to maintain high-quality standards. This involved rigorous testing and debugging of different components to ensure their reliability and performance.

> Abbott - Projects

Technology: HTML, CSS, JS, AEM

Highlights:

- Project is related to migration of the site from AEM 6.5 to AEM Cloud. My responsibilities encompassed content management and authoring, where I diligently worked on resolving frontend issues and addressing assigned tickets to enhance the overall user experience.
- My proficiency extended to multi-site management, where I skillfully handled language copies and live copies, ensuring seamless integration across platforms.
- Additionally, I successfully executed the rollout of pages and managed the publishing process, contributing to the efficient dissemination of content.
- Furthermore, my involvement included the configuration of components, reflecting my versatility in front-end aspects of the migration process.

➤ Pfizer - POC Projects

Technology: HTML, CSS, JS, Edge Delivery Services (AEM Franklin), GitHub, Google Documents

Highlights:

- Developed the home page of Pfizer using Edge Delivery Services.
- Explored and established the setup for Edge Delivery Services, ensuring efficient content delivery.
- Utilized document authoring to create visually appealing and structured content blocks.
- Applied CSS and JavaScript for enhanced design and interactive features on the webpage.
- Used GitHub for code management & Integrated GitHub with Google Document pages.

➤ Case Study- Projects

Technology: HTML, CSS, SCSS, JS, SIGHTLY, AEM

Highlights:

- In the course of my case study projects, I spearheaded the development of an Authorable Travel & Tourism Website utilizing Adobe Experience Manager (AEM).
- This multifaceted endeavor involved the creation of diverse web pages, including the Home page, About Us, and distinct Destination pages, each tailored to provide an immersive and informative user experience.
- My proficiency extended to the incorporation of advanced AEM features such as templates, sling models, experience fragments, custom components, tagging, client libraries, and policies.
- This project allowed me to demonstrate my expertise in AEM, showcasing my ability to create a robust and user-friendly digital platform for the travel and tourism website.
