## WORK EXPERIENCE

Cognizant Technology Solution (1.8 years & Working)

### ▷ Abbott - Projects

**Technology:** HTML, CSS, JS, AEM
**Highlights:**

- Project is related to migration of the site from AEM 6.5 to AEM Cloud. My responsibilities encompassed content management and authoring, where I diligently worked on resolving frontend issues and addressing assigned tickets to enhance the overall user experience.
- My proficiency extended to multi-site management, where I skillfully handled language copies and live copies, ensuring seamless integration across diverse platforms.
- Additionally, I successfully executed the rollout of pages and managed the publishing process, contributing to the efficient dissemination of content.
- Furthermore, my involvement included the configuration of components, reflecting my versatility in front-end aspects of the migration process.
- Overall, my comprehensive contributions have been instrumental in the successful transition to AEM Cloud, aligning the project with contemporary standards and enhancing its overall performance.

### ▷ Case Study- Projects

**Technology:** HTML, CSS, SCSS, JS, SIGHTLY, AEM
**Highlights:**

- In the course of my case study projects, I spearheaded the development of an Authorable Travel & Tourism Website utilizing Adobe Experience Manager (AEM).
- This multifaceted endeavor involved the creation of diverse web pages, including the Home page, About Us, and distinct Destination pages, each tailored to provide an immersive and informative user experience.
- My proficiency extended to the incorporation of advanced AEM features such as templates, sling models, experience fragments, custom components, tagging, client libraries, and policies.
- This project allowed me to demonstrate my expertise in AEM, showcasing my ability to create a robust and user-friendly digital platform for the travel and tourism website.
- I also created ford website using the same skills with different pages.
- Also created Pfizer Home Page using new leading technology AEM Franklin(Edge Delivery Service).
